

Career Experience Class

Created by Lebanon City Schools under the directions of Mrs. Bunny Brooks in 2018. The class provides an opportunity for students to explore real world experiences. The students are involved in internships, field trips, job shadowing, co-op experiences, presentations, conferences and volunteering. Many students use the class time to explore different careers, learn about the career fields and prepare for a future.

The Career Experience Mission is to provide an opportunity for every student to explore a career pathway.

Career Experience Class - "Learning Beyond the Classroom"

The Experience

Local businesses and companies allow students to have hands on experience developing soft skills for Future Ready Employees. Each student has class time, and work experience during the student day. These opportunities give valuable experience in the world of work.

Class Schedule

Each senior student completes their academic classes in the morning and participates in the Career Experience class in the afternoon. The triple block class allows students the flexibility to tour companies, listen to speakers, explore educational institutions, and have real world hands on experience.

Earning Credentials for the Real World

Many students have combined their experience with an articulation with our community colleges such as Sinclair Community College. Thirteen students earned their Business Customer Service Credential. Above Emma is displaying her Certificate in Mental Health First Aid.
