

Scenario 2

A student posts on social media that he tested positive for COVID-19. The student is a junior, and he is part-time at LHS and rides a bus to the Warren Career Center each day. In addition to being at school that day, the student attended a club meeting after school and then rode home in a car with three friends. On the way home, they stopped at Starbucks where they worked on a group project.

Response: School will contact the student/parent/caregiver to determine the validity of the positive case.

If it is a confirmed case:

1. The Warren County Health District will be contacted. WCHD will contact Starbucks and begin contact tracing. Anyone exposed will be quarantined.
2. The school will contact WCCC. WCCC will begin contact tracing. Anyone exposed will be quarantined.
3. The school will begin contact tracing for bus, school, club meeting, students in the car with the student. Anyone exposed will be quarantined.
4. Communication will be sent to the classroom and bus parents/caregivers indicating a positive COVID test on the bus and in the classroom. Additional communication will be sent to all parents/caregivers indicating a positive test in the building.
5. Communication will be sent to the parents/caregivers of the students in the car indicating a positive COVID test.
6. The student will be isolated for 10 days by the Warren County Health District. His entire household will be quarantined for at least 14 days. People who come in contact with an exposed person are not quarantined. However, they may choose to self-quarantine.
7. Areas of the school would have already been cleaned and disinfected as part of daily maintenance.

Scenario 3

A sixth-grade teacher reports that she heard one of her students say that her grandfather in a nursing home shares a room with someone who is being tested for COVID-19 and the student's mother was at the nursing home last night.

Response: This is not considered to be exposure and there would be no action on the part of the school other than to watch the student for symptoms.

Scenario 4

Two bus drivers call in sick at 5:00 a.m. and there are no substitute drivers available.

Response: Parents/caregivers of students riding on these buses will be contacted if there is a delay in routing due to this situation. All attempts will be made to pick up students on time, but the situation may dictate a late arrival of the bus. Parents/caregivers should have contingency plans in place for this situation.

Scenario 5

A student is going through the lunch line and observes a school employee who is perspiring heavily. The student or his parent makes a social media post that a school staff member is obviously ill.

Response: The school will not be reacting to social media posts. If the student or parent has a concern, they should contact the school.

Scenario 6

A teacher reports to her principal that she has tested positive for COVID and is certain that she was infected at a family cookout two weeks ago. The teacher has no symptoms.

Response: The teacher will be instructed to stay home and isolate. The teacher's household members will be quarantined.

1. The WCHD will be contacted and conduct contact tracing.
2. The school will conduct contact tracing. All staff and students who are determined to have been exposed will be quarantined.
3. Communication will be sent to classroom parents/caregivers indicating a positive test in the classroom and communication will be sent to building parents/caregivers indicating a positive test in the building.
4. The teacher's classroom will be thoroughly cleaned and disinfected prior to students being allowed back in it.

Scenario 7

Student-athlete returns from a family vacation in Florida, two days before school starts. The student comes to school on the first day and attends practice.

Response: While the school district would highly recommend a 14-day self-quarantine for the student and all family members that vacationed, it cannot enforce it at this time. The Governor has issued an advisory to all Ohio travelers to self-quarantine upon return, but the advisory is not a mandate. The student is permitted to attend following all safety protocols.

Scenario 8

Warren County moves to a purple level on the Governor's COVID-19 Risk Level Guidelines for the Public.

Response: All school buildings in the Lebanon City School District will close and students will move to remote learning with their classroom teachers. All athletic and extracurricular participation will cease.
